

# 600-10 & 600-10FW

Intended for auto shops, power plants and other narrow environments, the 600-10 carries a large oxygen and medium acetylene cylinder, carrying them front to back rather than the traditional side to side method. This two-tiered design ensures easy maneuverability through the tightest spots. This design can be modified to include a firewall by ordering the 600-10-FW.
